Signaline

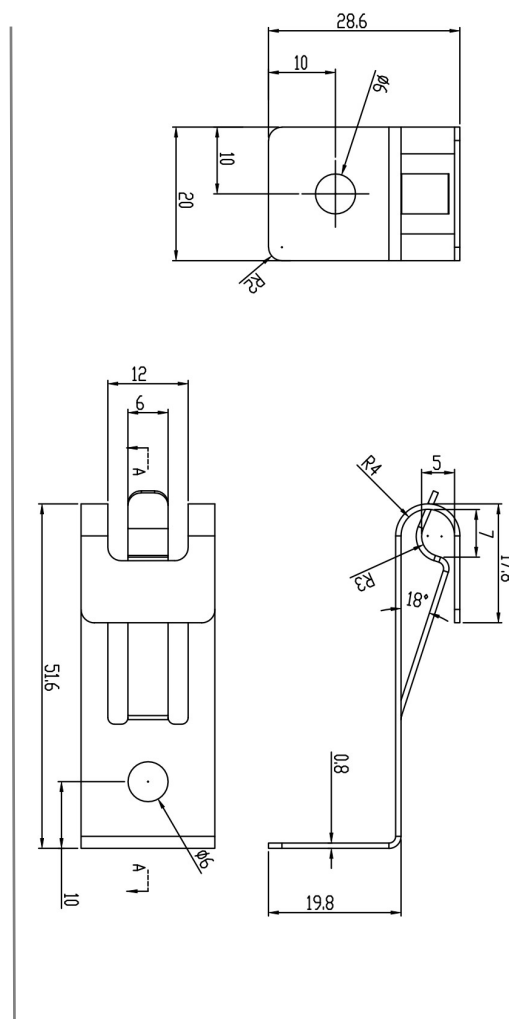

Model	Signaline J-Lock Clip
Dimensions	50mm x 10mm x 109mm
Pack size	100 clips per pack.
Pack weight	approx. 0.8kg
Mounting	Single screw
Material	Clip: Galvanised steel Cable sleeve: Silicone
Colour	Grey

The J-Lock clip is a single piece of moulded steel that secures Signaline Linear Heat Detection to a flat surface while allowing the correct airflow around the line-type heat detector to ensure compliance with EN54.

The J-Lock is unique in it's design, due to the spring loaded 'lock' that secures the line-type heat detector in place without the need for a cable tie. Thereby reducing waste and decreasing installation time.

Pack includes 100 pcs clips and 100 pcs silicone sleeves.
